Homeopathic remedies are classified by the FDA as over-the-counter drugs (a few are categorized Rx and are not available from Mediral International Inc.). These remedies are not intended for the treatment of critical or life-threatening diseases. Dr Recommends remedies are formulated for the relief of most common ailments and may be safely used in conjunction with other modes of standard medical therapy. Patients should be aware that while homeopaths do not have side-effects such as those commonly associated with synthetic drugs, a "proving" may occur. A homeopathic "proving" may occur within the first 72 hours of taking the remedy. Proving is symptoms caused by the action of the homeopathic and are generally mild in appearance. Proving may be determined by discontinuing the dosage. If symptoms do not lessen within 24 hours, it is not likely that they were caused by the homeopathic. It is natural for modest symptoms to be exhibited during the healing and cleansing of the body, but when symptoms grow in intensity or persist, consult a physician.

Mediral International Inc. owns and distributes the Dr Recommends line of homeopathic remedies and products to doctors and healthcare professionals worldwide. Mediral International Inc. also owns and distributes a second professional brand called Mediral. Please call for additional information. Mediral International is pleased to be associated with the American Association of Homeopathic Pharmacists, the Better Business Bureau, the Herb Research Foundation, the American Naturopathic Medicinal Pharmacists and the National Center for Homeopathy.

## DR RECOMMENDS PHILOSOPHY

Dr. Recommends homeopathic products are complex remedies developed for the busy healthcare professional. They are divided into categories for ease of use.

**Hormetic** remedies are detoxifiers used to assist the body in eliminating toxins from the body. They are gentle and do not generally produce a healing crisis or herxheimer- type reaction.

**Liquitrophic** remedies (usually in four ounce sizes) are low-potency formulas designed for supplementation to nutritionally support organ and tissue systems.

**Anodyne** remedies are specially formulated to alleviate specific types of pain and to aid the body in its repair of the underlying problems causing the pain.

**Combination** remedies might more appropriately be called symptomatic remedies, because they are designed for specific symptom pictures, such as headache or constipation.

**Restoratives** are remedies made from healthy glandular tissue to help with organs, glands or tissues that may not be functioning correctly.

**Oriental** formulas are homeopathic complexes using traditional Chinese medicine herbs.

**Miasm** remedies are high-potency complex formulas to address the inherent predispositions in clients that may serve as obstructions to healing.

**Psychological** remedies address the mental and emotional imbalances that may either precipitate or accompany physical illness.

**Allersode** remedies are homeopathic approaches to allergic desensitization, including specific allergens and other homeopathic ingredients known to mediate the allergic reaction.

**Sets.** Most treatment should consist of three products used simultaneously: a Liquitrophic remedy for support, a Restorative remedy to strengthen the tissues involved, and a Combination remedy to address the specific symptom picture.

**Dosing and posology.** The work and art of selecting the correct potencies has already been taken care of in the Dr. Recommends formulas. By incorporating the most commonly used potencies into the remedies, the body is able to select the most appropriate potency for its needs and discard the rest.

The recommended starting dose is 10-20 drops three times per day until improvement is seen. If the condition is acute, as in a cold or flu, the client will see better results with smaller doses more frequently, such as 6-10 drops every 20 minutes until improvement. Chronic conditions, such as joint pain, will generally respond better to less frequent dosing, such as 10-20 drops once or twice per day until improvement is seen.

## ABOUT MEDIRAL INTERNATIONAL INC.

Mediral International Inc. was established with a single purpose - to provide the highest quality natural healthcare products to the medical professional. With over 3000 mother tinctures and raw ingredients in stock, Mediral also provides singular remedies for classically oriented practices. Mediral currently distributes products in the United States, the United Kingdom, Korea, Taiwan, China, the Philippines, Singapore and throughout eastern Europe. Around the world, the name Mediral has come to mean quality and dependability.

The manufacturing facility for Mediral International is a federally and state registered pharmaceutical laboratory. Regular inspections by the Food and Drug Administration (FDA) ensure compliance with Current Good Manufacturing Practices (cGMP) and the Code of Federal Regulations (CFR). All Dr. Recommends homeopathic products are registered with the FDA and are assigned a National Drug Code (NDC), displayed on the main panel of the label. This number identifies each product as a unique, registered formula and helps to expedite third-party reimbursement programs.

The laboratory is a carefully monitored clean room environment with positive pressure airflow and HEPA filtration to maintain a work area free of contamination. Laboratory technicians are required to wear gowns, boots, hairnets and masks to further maintain a clean work area. Every batch of product is subjected to an extensive battery of quality control tests to ensure the purity of the final product. This testing includes culturing for biological contaminants, and an innovative type of analysis that measures the electromagnetic properties of the formulas. Additional tests include constant air quality monitoring, alcohol determination and organoleptic testing. These tests assure that each batch of product is standardized for safety, consistency and efficacy.

Most Dr Recommends products contain alcohol, which serves as a solvent during preparation of the raw materials, acts as a preservative and serves to increase the absorption rate of the homeopathic. Mediral uses alcohol in our homeopathic remedies because it enhances the efficacy of the remedy. A part of the homeopathic message is transmitted in the geometric structures formed in the solution, and the presence of alcohol adds one more structure to the solution for additional stability and efficacy.

Innovative manufacturing techniques set new standards of excellence for the industry and prove that not all homeopathic products are the same. Hand succussion is just one of the many unique procedures used during the manufacture of all Dr Recommends homeopathic products. Homeopathic medicine is sensitive to EM radiation and may be damaged by the electromagnetic fields created by automated processing machines. Mediral believes that even though hand succussion is more costly and time consuming, a superior product is worth the extra effort. The unique processes of manufacturing result in an activated, superior homeopathic medicine that acts quicker, deeper and longer.
